Leavenworth County Community Gating Criteria

- Local public health officials recognize that each district must make decisions regarding the opening and closing of in-person education in order to keep their students and staff safe and to provide a high quality, equitable education for all students.

- Reopening considerations provide a general framework for districts; each district will use this framework to meet its community's individual needs.

- The considerations are provided to help communities, districts, families/caregivers, and staff understand and articulate risks and benefits, which are inherent and inevitable during a pandemic.

- Gating criteria will be updated on a weekly basis, and is expected to change often. If a district determines that two or more of the criteria factors are in one color, it is suggested that district use the associated guidance for that color.

### Community Positive Percentage (% of persons testing positive for a 2-week period)

- Green (less than 5%)
- Yellow (5.1 - 15%)
- Red (15.1% or more)

### Total Cases per 100,000 (new cases over 100,000 population - change from 2-week period)

- 50 or less
- 51 - 200
- 201 or more
